

CAPABILITY STATEMENT

MM Drilling Pty Ltd is a well-established business which offers best-in-industry innovative and cost-effective programs for all commodities across the Australian mining industry.

Our drilling crews are experienced throughout Australia and have outstanding safety records that exceeds client's expectations.

With a wide range of surface drilling tools available, our rigs are capable of drilling in a variety of depths and challenging ground conditions. All our rigs are expertly maintained, multi-purposed and capable of executing a wide range of drilling activities.

Our team understand the many challenges and risks associated with complex drill projects and accessibility in remote regions across Australia.

WHY US?

We have the reputation as being a reliable, trustworthy and safety-first team to make sure your drilling jobs are on time and to budget. No job is too large or small – we can drill in the most difficult of geological conditions.

MM Drilling Values are the foundation of our family friendly business. We have a long list of references from industry leaders and strong relationships with our current and previous clients, which is reflected in our ongoing projects.

We are committed to providing a zero-harm workplace, utilising policies, procedures, risk assessments and hazard identification tools which are continuously improved to ensure the safety of all personnel, equipment and the environment. We work within lines of client's safety management system along with our own.

We add value at every stage of the drill process. Our team has worked with some of Australia's largest mining companies helping them to optimize their mining processing with safe reliable performance.

CAPABILITIES

We have many capabilities in all different harsh environments throughout Australia. We do:

- Production drilling in Quarry's
- Productions & sampling drilling in open mining pit operations
- Rotary drilling with holes up to 250mm & 53 meters
- Collar pipe & geotechnical drilling
- Probe Drilling & recording to allow mapping for voids & underground workings
- Pre-splits
- Contour & Pioneer Drilling (we have a vast amount of experience on contours & starting new mining operations)
- Technical Drilling
- Water Bores can be arranged.
- Workshop Major or Minor rebuilds
- Hire equipment & personnel

OUR VISION

MM Drilling has a vision to be the forefront of innovation in the drilling sector across all industries. We are dedicated to safely producing the highest quality service.

The values we promote in everything we do are:

COMMITMENT

Our Commitment is to give our clients the best quality service in the most affordable & efficient way.

RESPECT

We have the highest respect for our clients, each other & the machines we operate.

QUALITY

We take pride in providing high value services that we stand behind.

ACCOUNTABILITY

We give & seek clear expectations and hold ourselves accountable to meet our clients and our own expectations.

SAFETY

We strive to provide a work environment that reduces the risk to our employees by planning, teamwork & always using correct PPE, tools & procedures.

WORKSHOP

Our Head Office and Workshop are located in Geraldton, this allows for quicker mobilisation for major or minor overhauls.

We adhere to a strict maintenance and rebuild programs for all our equipment, with our fully equipped workshop and the wealth of knowledge of our fitters and management team, full ground up rebuilds can be completed in a fast and efficient manner.

We pride ourselves on minimal downtime and maximum production, allowing us to go above and beyond the targets set by our clients.

DRILL FLEET

GD5000

Built tough, these drills have reliable components, sturdy frames, robust booms and feeds that contribute to outstanding availability. GD5000 are designed to be easy to service with conveniences such as ground level access to all major service points and well-organized electrical and hydraulic arrangements.

- Hole Depth: up to 30 meters
- Diameter: 76mm - 152mm

Reich C-700

The C-700 has operated in many different applications throughout Australia. If you're looking to hit the targets and timeframes look no further than the C-700 with rotary and hammer options for all ground type arrangements.

- Pull Down: 60.000 lbs.
- Hole Size: 152mm - 229mm
- Max Depth: 53 meters
- Compressor: 1350 CFM

Western Star Prime Mover

The Western Star with drop deck, MM Drilling having the oversize permit accreditation makes it a very fast and simple to move rigs for mobilisations, rebuilds and major works.

Sandvik Pantera

Pantera DP1100i and DP1500i are intelligent hydraulic diesel-powered, self propelled top hammer drill rigs. Designed for large hole drilling in large quarries or open pit mine, construction work sites and wall control and development works.

Pantera DP1100i

- Hole Diameter: 89mm to 140mm
- Hole Depth: 33m
- Engine: C9 CAT

Pantera DP1500i

- Hole Diameter: 89mm - 152mm
- Hole Depth: 33mm
- Engine: C11 CAT
